

# Subcontract the creation of your metallic parts

Do you want to create small and medium ranges or create one or several prototypes but have neither the time nor the resources to invest in a casting line?

**metaconcept**  
Groupe

## → OUR SUBCONTRACTING SERVICE

- The design and production of silicone moulds
- The creation of parts via centrifugal casting
- Deburring
- Mechanical and manual polishing
- Surface treatments
- Provision of a technical laboratory

## → ADVANTAGES

- • No investment in a machine
- Quick turnaround time
- Operational subcontracting
- Cutting-edge equipment
- No fixed cost
- Parts supplied "ready to use"

## → FOR WHO?

Professionals working within metallurgy or the aeronautic, spatial, automotive, medical and dental industries.

## → POSSIBLE APPLICATIONS

- The design and production of prototypes
- The creation of parts that can be thermally fused
- The creation of complementary parts or those relating to your production line.

## → MATERIALS USED

- Centrifugal casting:  
zamak, white metals, polyurethane, polyester
- Mass finishing:  
steel, zamak, aluminium, cast iron, stainless steel, bronze, brass,  
white metal alloys, polyurethane, polyester

## → OUR RESOURCES

- Trained and competent staff
- Fully equipped centrifugal casting line (centrifuge, vibratory bowl, vacuum, surface treatment, etc.)
- Specially adapted, spacious and secure premises
- Strategic location close to Lyon
- Quick delivery

Parc des Sables - 17, route des Sables - 69630 CHAPONOST - France
